

SP Diagnostics have just launched a new Keys subscription for the SPi handset called iKeys Pro.

The iKeys Pro package works the same as the standard Keys package but also lets you program and add keys without needing a pincode on Ford vehicles. We will be adding more vehicles to the Pro subscription very soon.

All you need is a valid subscription to iKeys Pro, SPi handset and an Internet connection.

We have also released the Ford PATS 3 CAN system for Keys and iKeys Pro, plus the view saved screens function on the SPi handset. The SPi Suite now has an vehicle application viewer built into it. Update your SPi Suite and SPi handset to take advantage of these. [SPi Suite download](#)

To find out more about the iKeys Pro package please give call us on 0844 561 7861.
