SP Diagnostics Fast Track Update - SD27.3 iMAP & iKeys Update

---

**Fast Track Application Update**

You will receive this email with each release to advise you of the additions made to iKeys and iMAP software. When we release new software we will also notify you via the SP Diagnostics notification tool that is included as part of the SPi Suite. From time to time we will also include other important information that is relevant to our iMAP and iKeys users.

Highlights of this months release, include Renault Megane/Scenic 3 Electronic Parking Brake, which allows the user to set the EPB module into a Service Mode for rear brake pad replacement. This new coverage also offers Read & Clear Codes along with Component Data. We have also added more BSI variants for Peugeot/Citroen key programming, allowing for greater capability of PIN Code extraction on the CAN-BUS body controllers. (Valid Subscription required)
